

FREE Naturescaping Workshop and Native Plant Salvage

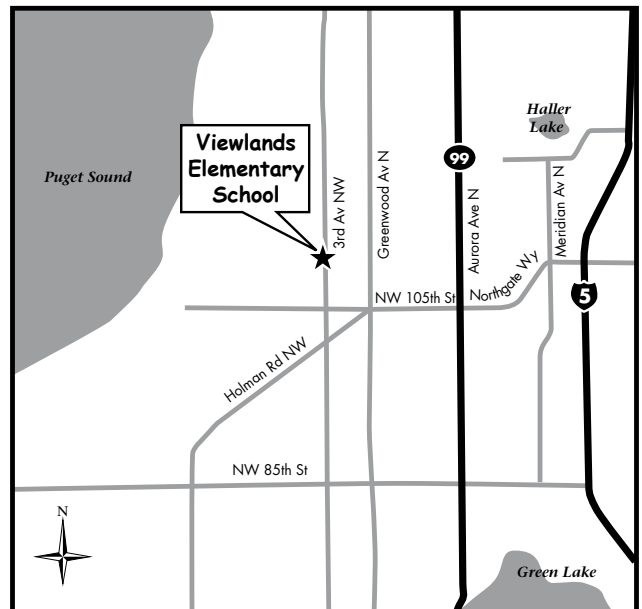

Learn how to create a low maintenance landscape that is healthier for people and critters. After this workshop, you will know how to design your landscape, shrink your lawn and reduce the amount of time and energy you spend on yard work. You will also learn how to attract birds and other wildlife using native plants. On Saturday, December 9 (9 a.m.-1 p.m.) participants can dig up native plants for their own naturescaping projects on a site scheduled for development. You need to attend a workshop to participate in the salvage.
